The committee approved the minutes for the 2/5/19 meeting.

The committee discussed the topic of capstone projects at Wells. The questions discussed were:

1. Should the capstone be interdisciplinary?
2. Should the capstone start in the Summer?
3. How much of capstone policy is under EPC purview?
4. How is the capstone affecting professor workload?
5. Are there major-specific capstone issues that require major-specific policies?

After discussing these questions, the committee resolved to discuss these and other questions further with other committees. In particular, curriculum and advisory committees have expressed interest.
