

Calculating Your Major GPA

In order to be eligible for graduation a student must have earned a GPA of at least 2.0 in the work in the major undertaken during the sophomore, junior, and senior years. Use the below table to calculate your major GPA.

Major: _____ Catalog of entry: _____

Course	Grade	Grade value	# of credits	Multiply credits by grade value	Quality Points
EX: PSY 101	B-	2.7	3	=	8.1
				=	
				=	
				=	
				=	
				=	
				=

Total credits:				Total Quality points:	

How to calculate your major GPA:

1. List all of the courses included in your major. Refer to your catalog of entry for a list of courses. Do not include internships or any other course without a letter grade (unless you earned a U).
2. List the grade and grade value (from below) you earned for any course you have already completed.
3. List the number of credits associated with each course.
4. Multiply the credits for each course by the grade value and record that number in the quality points column.
5. Add up all of your credits and all of your quality points and fill in that information in the last row.
6. Divide the total quality points by the total credits. This is your major GPA.

Grade Value Chart				
A+=4.3	B+=3.3	C+=2.3	D+=1.3	F=0
A=4.0	B=3.0	C=2.0	D=1.0	U=0
A-=3.7	B-2.7	C-=1.7	D-=0.7	

Total Quality Points/Total Credits= Major GPA

÷ =

If your major GPA is below a 2.0 you should see your advisor.
